

Customer On-line Scheduling

CDA Software v.10 now includes built-in on-line scheduling free of charge. We've worked hard to make this work seamlessly for you. From the moment you setup your CDA account your customers will have on-line scheduling access.

How does it work? You just need to setup your CDA scheduling "time-band", and you need to setup a "Sub-Status" to include a scheduling link. That's all. Customers will see your time-band as AM, Mid-Day and PM appointments.

Getting your customers on the schedule has never been simpler. There is no custom programming you need to do; CDA software handles it all for you. You can even text your customers a scheduling link directly from their claim.

Highlights

- Free On-line customer scheduling (no setup fee).
- No customization needed; it just works once you start using CDA.
- Customers schedule using the same time-band you setup in CDA.
- Your customers just click on a link and it works.
- True real-time scheduling for your customers (no more phone calls to schedule).
- Customers can also be sent an automated message to schedule.
- Customers are sent a link to schedule via sms or email.
- Customers pick the date and time that works best for them.
- Once a customer schedules their time slot (via text), they are sent a reply confirming the details of their scheduled appointment.
