

## Parts Inventory / Inventory Multiple Locations

CDA Software is the leader in parts inventory management, along with inventory management for multiple locations. Not only do we have bar code scanning and inventory label printouts for all your parts, but we also have an in-depth knowledge of the full parts life cycle. Thus ensuring you the minimum amount of lost inventory that can cost you thousands of dollars per month in lost revenue.

More and more companies have multiple locations, which is very difficult to manage on the parts side if you're not using CDA, we support parts inventory for multiple locations, most BMS providers that support the appliance & hvac industries do not offer this feature.

### Highlights

- Manage part inventories by each physical location.
- Assign parts to work orders in real-time to service units for faster turn around time.
- Field technician can browse and pull parts from their truck inventory to use on location.
- Each part gets a unique serialized tracking number.
- Every serialized tracking number has a unique history, so you always know where your inventory is.
- Track cost, retail amount, and core/dud amount on each part to ensure you never lose money on parts.
- Tracking labels are created for each part you put in your inventory.
- Manage your parts using a hand-held scanner.
- Mark parts as "core return, no credit due" or mark them as "field scrap", and so much more.
